This file captures an image of the Fetzer Franklin Fund website at www.fetzerfranklinfund.org as of May, 2020. Each file in this library contains the content from a different section of the website. The Fetzer Franklin Fund has been operated by the Fetzer Memorial Trust since its inception in 2005, with the support of the Fetzer Institute. The inspiration of this science program stemmed from the vision of John E. Fetzer, who wrote

“I feel that we are on the threshold of a new order where people will be seeking enlightened change. ... This will all come about with the infusion of spirituality into science. The Foundation’s eventual intent is to integrate the scientific process with spiritual mindedness ... A fundamental key to all this is to conduct this search with a proper line of scientific investigation.”

In the last ten years, Fetzer Franklin led breakthroughs in the following areas:

- 1 Relational Reality – the concept of the interconnection of all things at the quantum level now exists within mainstream physics academies in the world.
- 2 Metascience – the scientific study of the scientific method is a high priority for most major funding institutions in the world.
- 3 Advanced Protocols to study anomalous phenomena are becoming accepted. This could present an opportunity to advance mainstream investigation of extreme possibilities in the area of psi and subtle energy research. Psi, energy medicine, and subtle energy were dominant interests of John Fetzer. These revolutionary advanced protocols could help discern real effects from false positive effects which would catalyze substantial interest in these fields.

Book publication:

Emergent Quantum Mechanics

David Bohm Centennial Perspectives

PHYSICS

Relational Reality

Is the world intrinsically random or fundamentally interconnected?

Is the world local or nonlocal?

FOUNDATIONS

Metascience

What makes possible scientific truth and objectivity?

Are the foundations of science fixed or are the open to future revision?

CONSCIOUSNESS

Agency and Free Will

What is "agency" and how do parts of the physical world attain it?

What is consciousness and its place in the world?

BIOLOGY

New Visions of Life

Could there be a universal definition of life beyond DNA?

Can new informational techniques reveal novel forms of living organization?

OUR MISSION

The mission of the Fetzer Franklin Fund is to explore the frontiers of scientific knowledge and to advance breakthroughs towards scientific views of reality that are integrated and relational. In conducting its program of open exploration, the Fetzer Franklin Fund focuses on

foundational questions at the frontiers of physics, biology, and consciousness research. In addition, the Fund supports work that re-examines the foundations of science, including scientific methodologies for both conventional and frontier research.
